BEST TRIGGER

"They know they have a problem but aren't sure where to start."

That's exactly what the free QOA solves.

OBJECTION HANDLING, QUICK REFERENCE

"Why is the assessment free?"

Align invests in the QOA because it makes them a better implementation partner. They go in with their eyes open instead of discovering surprises mid-project. **That saves everyone time and money.**

"What's the catch?"

No catch. If the assessment says stay put, they'll shake hands and walk away. But every QOA they've run has surfaced **3 to 5 high-impact opportunities** the customer didn't know they were leaving on the table.

"We already have support."

SmartCare isn't generic support. It's a dedicated team that knows the customer's configuration **because they built it.** The 60-day inclusive period lets them experience the difference before committing.

"Why only 60 days?"

60 days covers the hyper-care window where 80% of post-go-live issues surface. **Most customers convert to a paid subscription** because they see the ROI by Day 30.

"We're not ready for a full project."

That's exactly the right time for a QOA. It's a zero-risk way to build the business case and get clarity on scope, timeline, and budget **before any commitment.**
