

BigOrange.Marketing
A Content & Inbound Marketing Agency

EXECUTIVE DELIVERY REVIEW / AUGUST 21, 2026

AUTHORITY HUB. BUILT TO BE CHOSEN.

Proposal delivery, search authority system, and two fully coded experience directions.

Make the right
buyer
feel the difference
before the first
meeting.

BIGORANGE.MARKETING

Show the thinking. Build the authority.

BigOrange finds the decisions, standards, and working style

THE SHORT VERSION

THE WORK IS BIGGER THAN A PAGE.

The pilot now includes research, authority architecture, a production-ready content system implementation specs, and two live noindex experiences that make the choice tangible.

35.00TOTAL RECONSTRUCTED

HOURS**3.50**

ADDED-VALUE HOURS

2LIVE EXPERIENCE
DIRECTIONS

ONE HONEST PRODUCTION GATE

Decisions are ready. Facts come first.

Janice's factual review, the WordPress direction, staging settings, technical QA, and publication approval still separate review from production. Both Netlify experiences remain noindex by design.

THE RESULT

A clear strategy. A full content and technical handoff. A stronger visual standard. And a clean path from factual review to launch.

PROPOSAL ALIGNMENT

WHAT THE PROPOSAL PROMISED.

● COMPLETE

RESEARCH FOUNDATION

Current-site audit, competitor review, Moz and Semrush keyword intelligence.

● COMPLETE

AUTHORITY ARCHITECTURE

Pillar structure, supporting content, FAQ logic, internal links, and AI-search strategy.

● PRODUCTION CANDIDATE

PRODUCTION CONTENT

One full pillar, two supporting articles, FAQ set, metadata, schema, and download.

● PRODUCTION CANDIDATE

TECHNICAL IMPLEMENTATION

WordPress assembly path, breadcrumbs, sitemap, Core Web Vitals plan, and QA.

● COMPLETE

OPERATING SYSTEM

AI-assisted editorial workflow, SME interview process, and the two-hour editorial target.

● FINAL GATE

ROADMAP + HANDOFF

90-day launch roadmap, 12-month expansion path, and final acceptance sequence.

Complete = evidence exists. Production candidate = built and awaiting factual or CMS review.
 Final gate = publication has not been claimed.

ARTIFACTS, NOT ADJECTIVES

THE STACK IS REAL.

The proposal is represented by usable work products—not a strategy summary that disappears after the meeting.

DISCOVER

- ✓ Current-site authority audit
- ✓ Competitor positioning review
- ✓ Moz ranking and keyword moat
- ✓ Semrush opportunity crosscheck
- ✓ Search-intent rationale

BUILD

- ✓ Authority-hub architecture
- ✓ Complete pillar page
- ✓ Two supporting articles
- ✓ Visible FAQ answer set
- ✓ Downloadable planning asset

IMPLEMENT

- ✓ Metadata and canonicals
- ✓ Schema and parity rules
- ✓ Breadcrumb and sitemap plan
- ✓ Internal-link map
- ✓ Core Web Vitals work order

OPERATE

- ✓ 90-day launch roadmap
- ✓ 12-month content roadmap
- ✓ SME interview workflow
- ✓ AI-assisted editorial workflow
- ✓ Acceptance and publication gates

PROTECT WHAT ALREADY WORKS

PROTECT THE SEARCH MOAT.

The strategy protects rankings BigOrange already owns, then strengthens the builder-specific language and proof around them.

KEYWORD	POSITION	VOLUME
agency for home builders	1	101-200
home builder marketing agency	1	51-100
marketing agency for home builders	1	51-100
digital home builder marketing agency	1	51-100
home builder digital marketing agency	2	51-100
home builder marketing company	2	51-100

THE MOVE

Keep the proven agency language. Add deeper builder-specific answers, proof, internal links and stronger conversion paths around it.

BUILD WHERE INTENT IS OBVIOUS

TURN BUILDER QUESTIONS INTO ENTRY POINTS.

The opportunity set is specific enough to support useful content and close enough to BigOrange's offer to deserve a place in the authority system.

home builder website design

WHAT WAS INTENTIONALLY LEFT OUT

Generic agency terms. Generic SEO terms. Homeowner “near me” traffic.

Traffic that cannot plausibly turn into a builder relationship is not a strategy.

SEARCH ANSWERS NEED PROOF

MAKE THE ANSWER EASY TO TRUST.

AEO and GEO work when a page gives people a sharp answer, gives machines a clean structure, and gives both enough evidence to believe it.

1

CLEAR QUESTION

Use the words a builder would type or say.

2

SHORT ANSWER

Answer first. Explain second.

3

REAL EVIDENCE

Connect the answer to BigOrange's process, expertise, and proof.

4

ENTITY CONTEXT

Link people, services, topics, and related pages into one coherent system.

5

VISIBLE = SCHEMA

Keep on-page answers and structured data in exact parity.

The rule that keeps the system honest:

**THE PAGE SAYS THE SAME THING
TO PEOPLE AND MACHINES.**

ONE HUB / MANY ENTRY POINTS

ONE HUB. A WHOLE SYSTEM.

The pillar does not have to carry every question alone. Each supporting asset has one clear job and a deliberate path back to the offer.

PILLAR

Marketing Agency for Builders

Own the category language and frame the full decision.

STAGE

PUBLISH

REFRESH

The two-hour target is built into the workflow. Measure it during the first approved production cycle.

INDUSTRY SIGNAL

BOLD ENOUGH TO STOP THE SCROLL.

A harder-edged, editorial direction built around construction imagery, dimensional type, decisive contrast, and an explicit content system.

DESIGN LOGIC

- ☒ Real builder imagery in a split-field hero
 ☒ Dimensional icons and bolder cards
- ☒ Swipeable process rail
 ☒ Images spaced across the long form
- ☒ Exact logo in a dedicated final chamber

<https://bigorange-marketing-homepage.netlify.app/>

PRIMARY PORTFOLIO

A FASTER, MORE CINEMATIC STORY.

This direction borrows the pace and typographic confidence of the Primary Portfolio, then rebuilds around BigOrange's audience, colors, proof, and home-builder category.

DESIGN LOGIC

- ✓ Shorter cinematic opening
- ✓ Stacked type with real depth and shadow
- ✓ Liquid-glass tabs and workspaces
- ✓ Faster cadence with the same substance
- ✓ Mobile tuned independently from desktop

<https://bigorange-marketing-homepage.netlify.app/primary/>

THE ENDING NOW BELONGS TO THE BRAND

THE PARTICLES END IN THE REAL LOGO.

The animation does not approximate the mark. It hands off to the exact BigOrange asset at full clarity, inside a dedicated final section with nothing fighting for attention.

**EXACT SOURCE****1000 × 338 transparent asset****DEDICATED CHAMBER****No competing copy or decoration****RESPONSIVE****Wide and mobile layouts keep the mark isolated****ACCESSIBLE MOTION****Reduced motion resolves directly to the logo**

MOBILE IS A REAL DESIGN

NOT A SMALL DESKTOP.

The content order, type scale, controls, cards, and logo chamber were tuned for narrow screens—not simply compressed until they fit.

VISIBLE FAQs / DIRECTION

40×40

BRANDED ICON SYSTEM

Menus, rails, tabs, FAQs, focus behavior, and responsive spacing all passed in-browser QA.

FROM REVIEW BUILD TO PRODUCTION

READY TO MOVE INTO WORDPRESS.

The hardcoded experiences establish the standard. Production still needs to preserve editability, exact CMS behavior, and the controls that keep search and performance clean.

● REVIEW LAYER

Two fully coded, responsive, noindex experience directions.

● CONTENT LAYER

Editable modular sections, reusable proof blocks, FAQ, and calls to action.

● SEARCH LAYER

Metadata, canonicals, schema, breadcrumbs, sitemap, and internal links.

● PERFORMANCE LAYER

Core Web Vitals work order, image handling, plugin audit, and duplicate-schema check.

PRODUCTION SEQUENCE

Janice fact review → choose direction → stage in the exact WordPress environment → validate schema, performance, mobile, and accessibility → approve publication

THE NEXT PHASE HAS A JOB

NINETY DAYS. NO MYSTERY.

The launch path is sequenced to protect the facts, protect the existing rankings, and get the authority system into market without creating technical debt.

DAYS 0-30

VALIDATE

- ✓ Run Janice's factual review
- ✓ Select the visual direction
- ✓ Confirm WordPress modules and plugins
- ✓ Stage the pillar, FAQ, and metadata
- ✓ Validate visible and schema parity

DAYS 31-60

LAUNCH

- ✓ Publish the authority hub
- ✓ Release both supporting articles
- ✓ Connect breadcrumbs and internal links
- ✓ Ship the downloadable asset
- ✓ Confirm sitemap and indexation

DAYS 61-90

LEARN

- ✓ Review qualified-query coverage
- ✓ Refresh weak or ambiguous answers
- ✓ Measure the first editorial cycle
- ✓ Expand the proof and FAQ backlog
- ✓ Prioritize the next builder questions

The goal is not more content.

**MORE USEFUL AUTHORITY.
AROUND QUESTIONS THAT CREATE FIT.**

COMPOUNDING AUTHORITY

A YEAR THAT GETS SHARPER EVERY QUARTER.

The bonus roadmap turns the pilot into an operating rhythm: protect, deepen, segment, and refresh.

Q1**FOUNDATION**

Launch the hub, articles, FAQ, internal links, download, and baseline.

Q2**PROOF + DEPTH**

Add builder examples, process proof, decision-stage answers, and SME-led content.

Q3**SEGMENTS**

Expand around custom builders, growth-stage teams, markets, and service-specific problems.

Q4**REFRESH**

Consolidate overlap, strengthen winners, update answers, and plan the next annual cycle.

MEASURE WHAT MATTERS

Qualified visibility / assisted inquiries / answer freshness / editorial throughput

THE EXPERIENCE LAYER WENT FURTHER

THE STRATEGY NOW HAS A STAGE.

The proposal called for an authority-hub pilot. The delivery now includes two complete coded worlds that let BigOrange react to the work instead of imagining it.

TWO CODED DIRECTIONS

Two coded worlds on one strategic spine.

LIQUID-GLASS UI

Layered cards, tabs, rails, and controls with clear hierarchy.

BRANDED ICON SYSTEM

Citrus cues. No generic number tiles.

PARTICLE LOGO HANDOFF

Animation resolves into the exact logo asset.

FULL RESPONSIVE QA

Desktop, tablet, and mobile layouts exercised in-browser.

LIVE REVIEW DEPLOY

Both directions published as noindex Netlify previews.

HUMANIZED COPY

Direct builder language. No assistant fog.

AEO / GEO LAYER

FAQ parity, entity context, and answer-first structure.

Above scope does not mean outside the strategy.

IT MAKES THE STRATEGY EASIER TO SEE, JUDGE, AND CHOOSE.

TRANSPARENT RECONSTRUCTION

35 HOURS, ACCOUNTED FOR.

Built from dated artifacts and completed work categories. This is not a precise stopwatch record.

A Content & Inbound Marketing Agency

FINAL PRODUCTION DECISION

READY WHEN THE FACTS ARE.

The system is built. The experiences are live for review. The remaining work is deliberate: verify, choose, stage, validate, approve.

- 1 Janice completes the factual review.
- 2 BigOrange chooses the experience direction.
- 3 The approved direction moves into editable WordPress modules.
- 4 Search, accessibility, performance, and mobile QA run on staging.
- 5 Publication happens only after the final approval.

BigOrange.Marketing

BUILD SOMETHING WORTH CHOOSING.
