

Build trust before the first call.

Final review candidate · strategy, search evidence, content system, site design, and implementation route.

INTERVIEW AND STAGING GATED

Evolve the existing page. Protect the authority it already owns.

BigOrange approved building the pillar into WordPress. Moz confirms the current `/marketing-agency-for-builders/` URL already owns valuable commercial intent.

#1

Home builder marketing agency

Desktop, latest Moz date

#1

Agency for home builders

Desktop and mobile

#13

Custom home builder marketing agency

Primary improvement phrase

Moz date: August 14, 2026

Build a connected canon, not another isolated page.

Margee and Paula

- Pillar, blogs, PDFs, FAQs, and case proof
- Fix mobile performance
- Improve alternatives and internal links
- Use Semrush plus Moz evidence

Emelia

- Supplied the historical Moz ranking export
- 171 current tracked terms
- Confirmed existing URL ownership
- Added rank and landing-page evidence

**A custom home
is a longer trust
decision.**

**“Your best work may take a year to build. A
buyer can decide whether to trust it in a few
minutes.”**

The page must make fit, process, proof, and the next step visible before asking for private information.

Five parts. One useful blueprint.

01

Position

Name the real operating difference.

02

Convert

Answer shortlist questions.

03

Earn visibility

Search, local, and AI answers.

04

Publish expertise

Human-sourced content.

05

Measure

Qualified demand.

Protect, improve, build, reject.

Protect on the hub

Agency and company terms already ranking between 1 and 3.

Improve on the hub

Exact custom-home-builder-agency niche language and solution framing.

Build as support

SEO, website conversion, planning, local search, automation, and blog questions.

Reject

Broad agency and homeowner intent that would dilute the pilot.

The pilot is a reusable authority system.

1 pillar

Designed production-content candidate for the existing URL.

2 articles

Builder website must-haves and five essential builder blog articles.

6 FAQs

Visible answers with matching schema.

1 download

Builder Marketing Readiness Checklist.

90 days

Build sequence and internal-link architecture.

12 months

Opportunity, risk, measurement, and scale roadmap.

AI accelerates. Experts own the truth.

Mobile performance is still the main launch blocker.

32

Mobile performance

LCP 36.1 seconds

TBT 1,110 ms

75

Desktop performance

LCP 2.7 seconds

TBT 20 ms

86

Accessibility

Contrast, ARIA, iframe title, heading, and link issues remain.

Fix the payload before calling the page done.

Largest opportunities

- About 703 KiB unused JavaScript
- About 966 KiB image savings
- 5.47 seconds render-blocking delay
- About 62 KiB unused CSS

Staging gate

- Correctly size and preload final hero
- Lazy-load below-fold media
- Remove unused builder modules
- Fix runtime and accessibility errors
- Retest after caches settle

Precise design. Marketer-owned modules.

Scoped design

`bom-` CSS classes prevent theme collisions.

12 modules

Hero, index, sections, cards, proof, FAQ, and CTA map directly into Beaver Builder.

Safe revision

Clone privately, assemble, QA, approve, then update the existing URL with rollback available.

Connect visibility to real builder fit.

Leading indicators

- Relevant non-brand visibility
- Movement to process and proof
- Downloads and consultation starts
- Search and AI referrals

Business indicators

- Qualified consultations
- Market, project, investment, and timing fit
- Sales acceptance
- Assisted pipeline and closed work

Conversion reporting remains pending validation until analytics, calls, bookings, consent, HubSpot, and sales definitions agree.

Everything available before the interview is built.

Complete

Research, keywords, architecture, roadmaps, workflow, current audit, page design, two articles, FAQ, schema, metadata, link map, assembly guide, QA, and download.

Interview gated

Janice's firsthand stories, exact expert language, and factual approval.

Access gated

Authenticated WordPress staging assembly, performance remediation, publish approval, and live verification.

**Approve
the source.
Verify the
build.
Publish
one
stronger
URL.**

Janice interview → factual edit → WordPress staging → mobile remediation
→ exact revision approval → live verification.
