

BILLING RECONCILIATION • GOOGLE ADS CUSTOMER 627-501-4654

Replenish and Fresh Blends Google Ads Balance Reconciliation

This report separates the Google Ads platform balance from the amount currently supported by campaign approvals, retained payments, and account-level credits. It does not assign personal liability.

Do not pay the full \$2,148.43 platform balance yet.

Four chargebacks totaling \$1,942.67 were added back on July 22–23. The dispute reason is not documented in Google Ads or the reviewed email record, and the Google credit still needs to be allocated to the correct campaign spend.

GOOGLE PLATFORM BALANCE

\$2,148.43

What Google Ads currently shows, not a finalized client invoice.

SUPPORTED PAYMENT EXPOSURE

\$1,356–\$1,813

Reconciliation range before the chargeback decision and final credit allocation.

CHARGEBACKS ADDED BACK

\$1,942.67

Four card disputes reported by the issuer on July 22–23.

\$0

Supported range: \$1,356.00–\$1,812.68

Platform: \$2,148.43

How the platform balance is built

Gross campaign cost, Apr 1–Jul 29	\$6,102.69
Less account-level credits and adjustments	(\$558.78)
Net Google Ads cost	\$5,543.91
Less payments still retained by Google	(\$3,395.48)
Current Google Ads balance	\$2,148.43

When the charges were disputed

Google says the card issuer reported protested charges and returned the amounts to the card.

	July 22	Payment charged back	\$500.00
	July 22	Payment charged back	\$500.00
	July 22	Payment charged back	\$442.67
	July 23	Payment charged back	\$500.00

Total returned through card disputes

\$1,942.67

REASON UNKNOWN

Why were they disputed?

Google Ads does not provide the cardholder’s reason. The reviewed Gmail window also contains no message from Mia explaining these disputes.

Do not label the disputes as fraud, dissatisfaction, or accidental without card-issuer evidence.

WHAT IS CONFIRMED

What happened to the balance?

The card issuer returned the disputed payment amounts. Google then added those amounts back to the Ads balance and suspended additional advertising costs.

Separately, Google shows a July 29 promotional credit of \$390.34 and other adjustments.

What Mia needs to provide

Confirm whether the four disputes were intentional, the exact issuer reason, who authorized them, and any dispute or case reference. A July 13 email only confirms that a replacement card was expected after a declined payment; it does not explain the later chargebacks.

Why the supported range has two endpoints

\$1,356.00 applies all \$558.78 of account-level credits to the approved-spend baseline. **\$1,812.68** reserves \$456.68 of those credits for the specifically credit-backed Pompano restart and applies the remaining \$102.10 to the baseline. Google must confirm the allocation before the final payable number is stated.

Where the ad cost came from

Thirteen campaigns were present: nine Replenish / 7-Eleven campaigns and four Fresh Blends / Kwik Trip campaigns.

Replenish / 7-Eleven • Florida			
		Gross \$3,192.24 • cap \$2,500.00	
CAMPAIGN	COST	CAP	VARIANCE
Pompano (Google label: "Pampano")	\$956.68	\$500.00	+\$456.68
Miami 56	\$622.57	\$500.00	+\$122.57
Coral Springs	\$578.96	\$500.00	+\$78.96
Howard	\$550.82	\$500.00	+\$50.82
Boca	\$483.21	\$500.00	-\$16.79
Florida total	\$3,192.24	\$2,500.00	+\$692.24
Pompano was restarted with express reference to Google credit. Its \$456.68 above-cap amount is therefore a credit-allocation question, not automatically a client-payable overage.			

Replenish • San Diego	
Gross \$810.26	
Torrey Del Mar	\$242.35
Miramar	\$241.92
Carmel Mountain	\$237.29
Solana Beach	\$88.70
San Diego total	\$810.26
Launch approval was located. An exact written spending ceiling was not located and needs confirmation.	

Fresh Blends / Kwik Trip		
Gross \$2,100.19		
Store #633	\$527.66	+\$27.66
Store #1161	\$526.41	+\$26.41
Store #1110	\$525.85	+\$25.85
Store #573	\$520.27	+\$20.27
Total vs. \$2,000 cap	\$2,100.19	+\$100.19
All four Fresh Blends campaigns remain in their own ledger and are not blended into Replenish cap calculations.		

Did this billing setup pay other Google Ads accounts?

No evidence of another Google Ads customer being funded.

The selected customer contains only Replenish / 7-Eleven and Fresh Blends / Kwik Trip campaigns. Other customers visible in the account selector show account access, not shared billing.

Scope checks completed

Current billing setup labeled Replenish	✓
13 campaign rows reviewed	✓
9 Replenish / 7-Eleven campaigns	✓
4 Fresh Blends / Kwik Trip campaigns	✓
Third-brand campaigns found	0

Important limitation

A payment card can potentially be reused on another Google Ads customer, but this selected customer's billing pages do not show another customer drawing from its billing setup.

The conclusion is therefore "no evidence found in this account," not a universal statement about every Google Ads customer accessible to the manager login.

REQUIRED NEXT ACTIONS

What Mia needs to do

1 Confirm the four disputes.

State whether the July 22–23 chargebacks were intentional and who authorized them.

2 Get the issuer's exact reason.

Provide the dispute reason and any case reference without sending full card details.

3 Confirm the campaign approvals.

Verify the Pompano credit-only restart and the approved San Diego spending ceiling.

4 Open a Google Ads billing reconciliation.

Ask Google to map the \$558.78 of credits and adjustments to the related campaign cost and confirm the true payable balance.

5 Pay only after the reconciliation is written.

Do not treat \$2,148.43 as the settled amount until Google and the card issuer reconcile the chargebacks.

Evidence used: live Google Ads Overview, Billing summary, Billing activity, Billing transfers, and campaign table for customer 627-501-4654; reviewed business Gmail searches covering July 15–29; documented campaign approvals and budget caps. This report is a billing reconciliation, not legal or card-issuer advice. No payment, dispute reversal, campaign restart, or billing-profile change was made.
