

Social Media Content Calendar

AUGUST 2026

Prepared for the Align Page and the Maher, Moe, and Joann profiles · Monday through Friday operation · three or four posts per week.

The full month runs fifteen posts: five original animations, three static case studies, two expert videos, three podcast clips, one founder article post, and one training carousel.

AT A GLANCE

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
3 The Record Trap Podcast clip	4	5 Implementation Starts Before Kickoff Original animation	6 GTAA: 12 Priority WFM Needs in Six Months Static case study	7 Six Things Before Payroll Implementation Founder static + article
10 Beumer: Seven Years of HR Data, Preserved Static case study	11	12 Train for the Job, Not the Screen Original animation	13	14 Public Service Cannot Pause Original animation
17 Troon: HCM Stability at Global Scale Static case study	18	19 Go Live Is the Starting Line Original animation	20 Joann Video Talking-head video	21

The Record Trap

TARGET	HR and operations executives weighing HCM value
ASSET	Video · 16:9 · finished clip
HEADLINE	An HCM platform can hold every record and still create very little value.
SUBHEAD	HCM value is earned through adoption, governance, and continuous improvement, never installation alone.

POST COPY

An HCM platform can hold every employee record and still create very little business value.

That is the trap.

The real return begins when the system helps managers make better decisions, gives employees a better experience, and connects workforce activity to the outcomes the business cares about.

Brent Skinner and I unpacked why HCM value is earned through adoption, governance, and continuous improvement. It is never created by installation alone.

What is your platform helping the business do today that it could not do a year ago?

WEDNESDAY, AUGUST 5

Implementation Starts Before Kickoff

TARGET	HR, payroll, and project leaders preparing implementations
ASSET	Video · 1920x1080 · 30.0s · H.264
HEADLINE	Most implementation risk is present before the kickoff meeting.
SUBHEAD	A strong implementation connects configuration, process decisions, integrations, testing, training, and ownership.

POST COPY

Most implementation risk is present before the kickoff meeting.

It lives in the process nobody has mapped, the data owner nobody has named, the integration nobody has tested, and the decision everyone assumes belongs to someone else.

A strong implementation connects configuration, process decisions, integrations, testing, training, and post-go-live ownership before those dependencies become expensive surprises.

The technology matters. So does the operating model around it.

What does your team still need to decide before configuration begins?

GTAA: 12 Priority WFM Needs in Six Months

TARGET	Public sector and aviation operations, HR, and WFM leaders
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	Airport operations do not pause while workforce management issues get sorted out.
SUBHEAD	Through SmartCare Stabilize, GTAA and Align HCM resolved 12 priority needs within six months.

POST COPY

Airport operations do not pause while workforce-management issues get sorted out.

GTAA supports more than 1,700 employees at Toronto Pearson while managing complex scheduling, accruals, leave, timekeeping, and union requirements.

Through SmartCare Stabilize, GTAA and Align HCM resolved 12 priority needs within six months. The work improved scheduling visibility, strengthened accrual-rule configuration, reduced compliance risk, and helped the internal team become more knowledgeable and self-sufficient.

The immediate issues mattered. So did building the capability to manage what came next.

#PublicSector #WorkforceManagement
#SmartCare

First comment: Read the GTAA case study:
<https://www.alignhcm.com/case-studies/gtaa-optimizes-workforce-management-with-align-hcm-and-ukg-pro-suite>

CASE STUDY · TRANSPORTATION

Twelve priority needs, cleared in six months.

Canada's largest airport runs on coverage that cannot slip. Align HCM turned a strained UKG Pro rollout into a platform. The GTAA team now runs with total confidence.

1,700+
EMPLOYEES SUPPORTED

12
PRIORITY NEEDS RESOLVED

6 mo
TO A STABLE ENVIRONMENT

THE SITUATION

GTAA had pushed UKG Pro into advanced scheduling, accruals, and leave, and the strain showed fast: scheduling friction, strict union compliance to honor, and accrual rules nobody could pin down.

WHAT ALIGN DID

A dedicated Align team, through SmartCare Stabilize, rebuilt the configuration, wired best practices into everyday use, and handed over real knowledge across scheduling, timekeeping, and compliance.

THE OUTCOME

Scheduling got easier to run, accruals lined up with every union agreement, compliance risk fell, and GTAA walked away running the platform on its own.

WHAT CHANGED FOR THE TEAM

- Scheduling and coverage that is easy to see
- Accruals aligned to every union agreement
- Less compliance risk and a lighter admin load
- An HR team that owns the platform

INDUSTRY TRANSPORTATION PLATFORM UKG PRO SERVICE SMARTCARE STABILIZE

01
Set the priorities

Mapped the twelve priority needs across scheduling, accruals, and leave.

02
Tuned the platform

Rebuilt the configuration on best practices that hold.

03
Transferred the knowledge

Walked the HR team through every workflow, hands on.

04
Handed it back

Left GTAA running a platform it can trust.

"The services from Align are exceptional. The consultants are proactive, responsive, and show a real dedication to delivering results."

Ryan Roncesvalles, Manager, HR Systems, GTAA

Six Things Before Payroll Implementation

TARGET	HR, payroll, finance, and operations leaders planning projects
ASSET	Static · landscape social resize
HEADLINE	There are six things I tell businesses before a payroll implementation starts.
SUBHEAD	None of them begin with configuration.

Align
HUMAN CAPITAL MANAGEMENT

**6 THINGS I TELL
BUSINESSES BEFORE
PAYROLL
IMPLEMENTATION**

WRITTEN BY
Maher El-Abdallah
CEO, Align HCM

POST COPY

There are six things I tell businesses before a payroll implementation starts.

None of them begin with configuration.

They begin with understanding the current state, treating migration as business work, assigning real owners, protecting parallel testing, training people for their actual roles, and planning for support after go live.

Payroll trust is built in the decisions a team makes before the first file is converted.

I put the full list in this article. If you are preparing for a project, use it as a conversation guide with HR, payroll, finance, operations, and your implementation partner.

MONDAY, AUGUST 10

Beumer: Seven Years of HR Data, Preserved

TARGET	HRIS, IT, and data leaders retiring legacy systems
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	Moving to a new HCM platform is one project. Preserving the workforce history behind it is another.
SUBHEAD	Seven years of HR data for about 1,000 employees, out of two legacy systems, preserved in UKG Pro.

POST COPY

Moving to a new HCM platform is one project. Preserving the workforce history behind it is another.

Beumer needed to move seven years of HR data for approximately 1,000 employees out of two legacy systems before an ADP contract expired. The records included job history, performance documentation, status changes, and payroll information.

Align HCM managed the extraction, conversion, loading, and validation work so Beumer could retain access to critical history in UKG Pro and retire the legacy environment.

Good data conversion is not just moving files. It is preserving trust, continuity, and compliance.

#DataConversion #HRTechnology
#HCMImplementation

First comment: Read the Beumer case study:
<https://www.alignhcm.com/case-studies/beumer-partners-with-align-to-overcome-legacy-data-challenges>

CASE STUDY · MANUFACTURING

Seven years of HR history, preserved.

An expiring ADP contract put seven years of records on the line, and Beumer needed every job history, review, and pay detail to survive the move. Align HCM brought it across whole.

7 yrs OF HR RECORDS
1,000 EMPLOYEES
2 LEGACY SYSTEMS RETIRED
All KEY HISTORY RETAINED

THE CHALLENGE
Beumer had to extract, convert, and validate very different record types against a hard deadline, coordinating ADP and UKG at once while protecting data integrity, compliance, and everyday HR.

THE SOLUTION
Beumer chose Align for proven expertise in complex HR data conversion and deep knowledge of both platforms. Align ran the migration end to end, with the history reachable the entire way.

THE OUTCOME
Every critical record landed in UKG Pro securely, the legacy ADP environment went dark, and Beumer kept full access to its history for audits, compliance, and reporting.

WHY IT MATTERED

- Audits, compliance, and everyday HR all lean on the record
- Ongoing legacy maintenance costs, gone
- Data integrity had to hold across both vendors at once
- Full access to workforce history, never interrupted

SCOPE -1,000 EMPLOYEES SYSTEMS ADP TO UKG PRO SERVICE DATA CONVERSION

01 **Extracted and cleansed**
Pulled every record type out of two legacy systems.

02 **Converted and mapped**
Translated each record into the UKG Pro structure.

03 **Loaded securely**
Moved the data into UKG Pro with no disruption.

04 **Validated to source**
Proved every record matched, line by line.

Two legacy systems retired. The history stayed whole.

Train for the Job, Not the Screen

TARGET	HR, enablement, and training leaders driving adoption
ASSET	Video · 1920x1080 · 45.0s · H.264
HEADLINE	One HCM system creates very different learning needs.
SUBHEAD	Align Academy builds practical training around roles, workflows, terminology, and business scenarios.

POST COPY

One HCM system creates very different learning needs.

Employees need confidence completing essential tasks. Managers need clarity around approvals, decisions, and exceptions. Administrators need the depth to diagnose issues and keep the process moving.

Align Academy builds practical training around the roles, workflows, terminology, and business scenarios people actually encounter.

Training should prepare someone to do the work, not simply tour the screen.

FRIDAY, AUGUST 14

Public Service Cannot Pause

TARGET	Public sector HR, operations, and program leaders
ASSET	Video · 1920x1080 · 60.0s · H.264
HEADLINE	Public service depends on workforce operations people can trust.
SUBHEAD	Complex rules, essential service coverage, accurate time and pay, and reliable reporting shape the mission.

POST COPY

Public service depends on workforce operations people can trust.

Complex labor rules, essential-service coverage, time and payroll accuracy, and reliable reporting are not back-office details. They shape whether teams can deliver for the communities that depend on them.

Modernization works when implementation, training, integrations, and ongoing support reflect the operating reality of the people using the system every day.

The mission cannot pause while the workforce platform catches up.

Troon: HCM Stability at Global Scale

TARGET	Hospitality and multi site operations and HR executives
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	At global scale, HCM stability has to survive constant change.
SUBHEAD	30,000 employees, 900+ locations, 35+ countries, one stabilized UKG environment.

POST COPY

At global scale, HCM stability has to survive constant change.

Troon supports 30,000 employees across more than 900 locations in more than 35 countries. Its UKG environment also had to navigate continuous acquisitions, union complexity, and team turnover.

Align HCM helped stabilize that environment so the business could keep moving through change.

Scale makes every workaround louder. Stability gives the team room to operate.

#Hospitality #HCMOptimization
#WorkforceManagement

First comment: Read the published Troon client story: <https://www.alignhcm.com/align-hcm-smartcare>

— CLIENT STORY · HOSPITALITY

One workforce standard across 900+ locations.

Nonstop acquisitions, layered union rules, and turnover could have splintered one UKG environment into chaos. Align HCM kept it to a single standard the business trusts as it grows.

30,000
EMPLOYEES

900+
LOCATIONS

35+
COUNTRIES

THE SITUATION

Troon runs one workforce environment through nonstop change: new acquisitions landing, union requirements stacking up, and seasoned administrators moving on.

WHAT ALIGN DID

Align HCM held the UKG environment steady with structured, expert care, clearing issues, protecting the configuration through every change, and keeping the platform matched to how Troon actually operates.

THE OUTCOME

The operation held steady while the footprint grew, so scale never turned into 900 separate workarounds.

WHY SCALE MAKES IT HARDER

- Every acquisition brings new rules and new people
- Turnover drains platform knowledge
- Union requirements differ site to site
- A workaround at 900 locations is 900 workarounds

INDUSTRY HOSPITALITY · GOLF FOOTPRINT GLOBAL PLATFORM UKG SERVICE SMARTCARE

01
Cleared the issues

Worked the queue down with experts who knew the environment.

02
Protected the build

Kept the configuration sound as acquisitions kept landing.

03
Held the alignment

Kept the platform matched to how the business runs.

04
Scaled without drag

The footprint grew. The standard stayed in place.

Scale makes every workaround louder. Stability gives the team room to operate.

Go Live Is the Starting Line

TARGET	HCM platform owners and HRIS leaders after go live
ASSET	Video · 1920x1080 · 60.0s · H.264
HEADLINE	Go live is the starting line.
SUBHEAD	SmartCare supports maintenance and optimization from stabilization to continuous improvement.

POST COPY

Go live is the starting line.

The first weeks after launch reveal what project plans cannot: where managers hesitate, which reports are missing context, what exceptions are taking too long, and which workarounds are beginning to form.

SmartCare supports ongoing platform maintenance and optimization through structured maintenance, proactive improvements, issue triage, roadmap guidance, and expert knowledge transfer.

The goal is not only to close the next ticket. It is to create a path from stabilization to continuous improvement.

Treat the Platform Like a Product

TARGET	HR and IT leadership accountable for adoption
ASSET	Video · 1920x1080 source · 1200x627 full frame
HEADLINE	Treat the HCM platform like a product, not a utility.
SUBHEAD	A product has users, priorities, feedback, an owner, and a roadmap.

POST COPY

Treat the HCM platform like a product, not a utility.

A utility is expected to run quietly. A product has users, priorities, feedback, an owner, and a roadmap.

That difference changes the questions leadership asks.

Are managers completing the process? Are employees getting a better experience? Is the data becoming more useful? Which improvements matter next? Who is accountable for adoption?

The organizations that keep earning value after go live usually have someone asking those questions consistently.

One System, Three Learning Paths

TARGET	Training, enablement, and HR operations leaders
ASSET	Carousel · 1080x1350 slides
HEADLINE	One HCM system. Three very different learning paths.
SUBHEAD	Employees, managers, and administrators each need something different from training.

POST COPY

One HCM system. Three very different learning paths.

Employees need confidence completing essential tasks.

Managers need clarity on approvals, decisions, and exceptions.

Administrators need the depth to diagnose issues, maintain the process, and support everyone else.

Giving all three audiences the same demo is easy for the training calendar and expensive for adoption. Start with the role, map the real workflow, and practice the moments where confidence usually breaks down.

#RoleBasedTraining #AlignAcademy #ChangeEnablement

THURSDAY, AUGUST 27

Four Decisions Every HCM Integration Needs

TARGET	HRIS, IT, and integration owners
ASSET	Video · 16:9 · to record
HEADLINE	An integration can move data and still fail the business.
SUBHEAD	The difference is in the operating decisions behind the connection.

POST COPY

An integration can move data and still fail the business.

The difference is in the operating decisions behind the connection: which system owns the field, what triggers the update, what happens when a record fails, and who owns monitoring after go live.

Moe El-Abdallah leads Technical Services at Align HCM. In this follow-up, he breaks down the four questions his team wants answered before an integration is ready to build.

Eliminating manual work takes more than an API. It takes a reliable process around the data.

#SystemIntegration #HCM #HRTechnology

MONDAY, AUGUST 31

Speak the CFO's Language

TARGET	HR leaders building the finance conversation
ASSET	Video · 1920x1080 source · 1200x627 full frame
HEADLINE	HR technology earns executive attention when it speaks the language of business outcomes.
SUBHEAD	Connect uptime, clean payroll, and adoption to capacity, cost, risk, and retention.

POST COPY

HR technology earns executive attention when it speaks the language of business outcomes.

System uptime matters. Clean payroll matters. Adoption matters. The conversation with finance becomes more useful when those measures connect to capacity, labor cost, risk, productivity, retention, and the decisions leaders are trying to make.

The goal is not to turn every people decision into a finance exercise. It is to create common ground so workforce investments can be understood, prioritized, and improved.

#HCMROI #CFO #PeopleAnalytics
