The Team That Finishes It

TARGET	HR, IT, and finance leaders choosing an HCM partner
ASSET	Video · 1920x1080 · 52.6s · H.264
HEADLINE	Selection is the easy decision.
SUBHEAD	An implementation, support, and optimization firm built entirely around HCM.

POST COPY

You picked the platform. Now the hard part starts.

Selection is the easy decision. Everything after it is where the value is won or lost, and every rollout hits the same five walls: data conversion, integrations, parallel payroll, go live, and adoption.

Align HCM is the team that finishes it. Assessments, implementation, and training, client side leads and M&A support, and ongoing help after go live through SmartCare.

The point of all of it is moving from system problems to measurable outcomes.

WEDNESDAY, AUGUST 5

Don't Let the Demos Decide

TARGET	HR, IT, finance, and operations leaders running a vendor evaluation
ASSET	Static · landscape social resize
HEADLINE	The best HCM system is not the one with the smoothest demo.
SUBHEAD	15 evaluation questions and a weighted scorecard, for the decision before the demos.

POST COPY

Disciplined HCM evaluations turn into presentation contests more often than anyone admits.

One vendor has a beautiful employee experience. Another has an impressive dashboard. Everyone leaves with a different favorite, because nobody agreed on the decision before the demos started.

The fix is a better decision model. Define the outcomes and the decision rights first, document the hard operating scenarios, bring the right people into the room, and make every vendor prove the same things.

Maher El-Abdallah put 15 evaluation questions and a weighted scorecard in one place, so implementation effort, adoption, support, and long term ownership get scored next to product capability.

GTAA: 12 Priority WFM Needs in Six Months

TARGET	Public sector and aviation operations, HR, and WFM leaders
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	Airport operations do not pause while workforce management issues get sorted out.
SUBHEAD	Through SmartCare Stabilize, GTAA and Align HCM resolved 12 priority needs within six months.

POST COPY

Airport operations do not pause while workforce-management issues get sorted out.

GTAA supports more than 1,700 employees at Toronto Pearson while managing complex scheduling, accruals, leave, timekeeping, and union requirements.

Through SmartCare Stabilize, GTAA and Align HCM resolved 12 priority needs within six months. The work improved scheduling visibility, strengthened accrual-rule configuration, reduced compliance risk, and helped the internal team become more knowledgeable and self-sufficient.

The immediate issues mattered. So did building the capability to manage what came next.

#PublicSector #WorkforceManagement
#SmartCare

First comment: Read the GTAA case study:
<https://www.alignhcm.com/case-studies/gtaa-optimizes-workforce-management-with-align-hcm-and-ukg-pro-suite>

CASE STUDY · TRANSPORTATION

Twelve priority needs, cleared in six months.

Canada's largest airport runs on coverage that cannot slip. Align HCM turned a strained UKG Pro rollout into a platform. The GTAA team now runs with total confidence.

1,700+
EMPLOYEES SUPPORTED

12
PRIORITY NEEDS RESOLVED

6 mo
TO A STABLE ENVIRONMENT

THE SITUATION

GTAA had pushed UKG Pro into advanced scheduling, accruals, and leave, and the strain showed fast: scheduling friction, strict union compliance to honor, and accrual rules nobody could pin down.

WHAT ALIGN DID

A dedicated Align team, through SmartCare Stabilize, rebuilt the configuration, wired best practices into everyday use, and handed over real knowledge across scheduling, timekeeping, and compliance.

THE OUTCOME

Scheduling got easier to run, accruals lined up with every union agreement, compliance risk fell, and GTAA walked away running the platform on its own.

WHAT CHANGED FOR THE TEAM

- Scheduling and coverage that is easy to see
- Accruals aligned to every union agreement
- Less compliance risk and a lighter admin load
- An HR team that owns the platform

INDUSTRY TRANSPORTATION PLATFORM UKG PRO SERVICE SMARTCARE STABILIZE

01
Set the priorities

Mapped the twelve priority needs across scheduling, accruals, and leave.

02
Tuned the platform

Rebuilt the configuration on best practices that hold.

03
Transferred the knowledge

Walked the HR team through every workflow, hands on.

04
Handed it back

Left GTAA running a platform it can trust.

"The services from Align are exceptional. The consultants are proactive, responsive, and show a real dedication to delivering results."

Ryan Roncesvalles, Manager, HR Systems, GTAA

Toronto Pearson

MONDAY, AUGUST 10

Beumer: Seven Years of HR Data, Preserved

TARGET	HRIS, IT, and data leaders retiring legacy systems
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	Moving to a new HCM platform is one project. Preserving the workforce history behind it is another.
SUBHEAD	Seven years of HR data for about 1,000 employees, out of two legacy systems, preserved in UKG Pro.

POST COPY

Moving to a new HCM platform is one project. Preserving the workforce history behind it is another.

Beumer needed to move seven years of HR data for approximately 1,000 employees out of two legacy systems before an ADP contract expired. The records included job history, performance documentation, status changes, and payroll information.

Align HCM managed the extraction, conversion, loading, and validation work so Beumer could retain access to critical history in UKG Pro and retire the legacy environment.

Good data conversion is not just moving files. It is preserving trust, continuity, and compliance.

#DataConversion #HRTechnology
#HCMImplementation

First comment: Read the Beumer case study:
<https://www.alignhcm.com/case-studies/beumer-partners-with-align-to-overcome-legacy-data-challenges>

CASE STUDY · MANUFACTURING

Seven years of HR history, preserved.

An expiring ADP contract put seven years of records on the line, and Beumer needed every job history, review, and pay detail to survive the move. Align HCM brought it across whole.

7 yrs OF HR RECORDS
1,000 EMPLOYEES
2 LEGACY SYSTEMS RETIRED
All KEY HISTORY RETAINED

THE CHALLENGE
Beumer had to extract, convert, and validate very different record types against a hard deadline, coordinating ADP and UKG at once while protecting data integrity, compliance, and everyday HR.

THE SOLUTION
Beumer chose Align for proven expertise in complex HR data conversion and deep knowledge of both platforms. Align ran the migration end to end, with the history reachable the entire way.

THE OUTCOME
Every critical record landed in UKG Pro securely, the legacy ADP environment went dark, and Beumer kept full access to its history for audits, compliance, and reporting.

WHY IT MATTERED

- Audits, compliance, and everyday HR all lean on the record
- Ongoing legacy maintenance costs, gone
- Data integrity had to hold across both vendors at once
- Full access to workforce history, never interrupted

SCOPE -1,000 EMPLOYEES SYSTEMS ADP TO UKG PRO SERVICE DATA CONVERSION

01 **Extracted and cleansed**
Pulled every record type out of two legacy systems.

02 **Converted and mapped**
Translated each record into the UKG Pro structure.

03 **Loaded securely**
Moved the data into UKG Pro with no disruption.

04 **Validated to source**
Proved every record matched, line by line.

Two legacy systems retired. The history stayed whole.

HR at the Table

TARGET	HR and business leaders building the executive conversation
ASSET	Video · 1200x626 · 2m13s · H.264
HEADLINE	A system of record is the smallest version of the job.
SUBHEAD	Mahe El-Abdallah and Brent Skinner on building a foundation for decisions.

POST COPY

HR and payroll get seen as systems of record. That is the smallest version of the job.

In this conversation with Brent Skinner, Mahe El-Abdallah makes the case for being intentional about leveraging the platform for decision making, not only for processing.

Building a foundation is the work. Operational efficiency and the ability to leverage what the system already knows come after it, and only if the foundation is solid.

That is what it takes to bring HR to the table.

#HRLeadership #HCM #PayrollOperations

FRIDAY, AUGUST 14

Public Service Cannot Pause

TARGET	Public sector HR, operations, and program leaders
ASSET	Video · 1920x1080 · 60.0s · H.264
HEADLINE	Public service depends on workforce operations people can trust.
SUBHEAD	Complex rules, essential service coverage, accurate time and pay, and reliable reporting shape the mission.

POST COPY

Public service depends on workforce operations people can trust.

Complex labor rules, essential-service coverage, time and payroll accuracy, and reliable reporting are not back-office details. They shape whether teams can deliver for the communities that depend on them.

Modernization works when implementation, training, integrations, and ongoing support reflect the operating reality of the people using the system every day.

The mission cannot pause while the workforce platform catches up.

MONDAY, AUGUST 17

Troon: HCM Stability at Global Scale

TARGET	Hospitality and multi site operations and HR executives
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	At global scale, HCM stability has to survive constant change.
SUBHEAD	30,000 employees, 900+ locations, 35+ countries, one stabilized UKG environment.

POST COPY

At global scale, HCM stability has to survive constant change.

Troon supports 30,000 employees across more than 900 locations in more than 35 countries. Its UKG environment also had to navigate continuous acquisitions, union complexity, and team turnover.

Align HCM helped stabilize that environment so the business could keep moving through change.

Scale makes every workaround louder. Stability gives the team room to operate.

#Hospitality #HCMOptimization
#WorkforceManagement

First comment: Read the published Troon client story: <https://www.alignhcm.com/align-hcm-smartcare>

CLIENT STORY · HOSPITALITY

One workforce standard across 900+ locations.

Nonstop acquisitions, layered union rules, and turnover could have splintered one UKG environment into chaos. Align HCM kept it to a single standard the business trusts as it grows.

30,000
EMPLOYEES

900+
LOCATIONS

35+
COUNTRIES

THE SITUATION

Troon runs one workforce environment through nonstop change: new acquisitions landing, union requirements stacking up, and seasoned administrators moving on.

WHAT ALIGN DID

Align HCM held the UKG environment steady with structured, expert care, clearing issues, protecting the configuration through every change, and keeping the platform matched to how Troon actually operates.

THE OUTCOME

The operation held steady while the footprint grew, so scale never turned into 900 separate workarounds.

WHY SCALE MAKES IT HARDER

- Every acquisition brings new rules and new people
- Turnover drains platform knowledge
- Union requirements differ site to site
- A workaround at 900 locations is 900 workarounds

INDUSTRY HOSPITALITY · GOLF FOOTPRINT GLOBAL PLATFORM UKG SERVICE SMARTCARE

01
Cleared the issues

Worked the queue down with experts who knew the environment.

02
Protected the build

Kept the configuration sound as acquisitions kept landing.

03
Held the alignment

Kept the platform matched to how the business runs.

04
Scaled without drag

The footprint grew. The standard stayed in place.

Scale makes every workaround louder. Stability gives the team room to operate.

WEDNESDAY, AUGUST 19

Every Industry Depends On It

TARGET	Operations and HR leaders in regulated, multi site industries
ASSET	Video · 1920x1080 · 64.6s · H.264
HEADLINE	Different work. One standard for operational trust.
SUBHEAD	Healthcare, public sector, manufacturing, retail and hospitality, services and distribution.

POST COPY

Workforce technology for the work every industry depends on.

A hospital, a plant floor, and a distribution center do very different work. Their workforce systems still face the same pressures.

Align HCM builds one workforce foundation without flattening industry complexity: design for the work itself, connect coverage and pay, and keep the platform relevant.

Different work. One standard for operational trust.

Peco Foods: Stability After a Rocky Go Live

TARGET	Food manufacturing and multi plant operations and HR leaders
ASSET	Static · 1080x1350 and 1080x1920
HEADLINE	Stability after go live is what turns a new platform into a working practice.
SUBHEAD	7,000 employees, three states, three unions, a dependable practice in under six months.

POST COPY

Stability after go live is what turns a new platform into a working practice.

Peco Foods runs union represented poultry plants across three states, where every assignment lands on output, safety, and a real paycheck.

Right after go live the cracks showed. Complex plant shifts, three union agreements pulling different ways, and time and pay that could not afford a bad week.

Align HCM steadied the configuration, cleared the exception backlog, and handed the team the knowledge to run the platform on its own.

Inside six months Peco went from recurring fires to a workforce management practice the operation leans on every week.

#FoodManufacturing #WorkforceManagement
#PostGoLive

First comment: Read the Peco Foods client story:
<https://www.alignhcm.com/case-studies>

CLIENT STORY · FOOD MANUFACTURING

From a rocky go live to a practice that holds.

Peco Foods runs multi state, union represented poultry plants where every assignment lands on output, safety, and a real paycheck. When the platform stumbled after go live, Align HCM made it dependable.

7,000
EMPLOYEES

3
STATES

3
UNIONS

<6 mo
TO A THRIVING PRACTICE

THE SITUATION

Right after go live, the cracks showed in a demanding, around the clock operation: complex plant shifts, three union agreements pulling different ways, and time and pay that could not afford a bad week.

WHAT ALIGN DID

Align steadied the configuration, cleared the exception backlog, and handed the team the knowledge to run the platform without leaning on anyone.

THE OUTCOME

Inside six months, Peco went from recurring fires to a workforce management practice the operation leans on every single week.

THE OPERATING REALITY

■ Processing plants running around the clock

■ Every exception lands on a real paycheck

■ Union rules woven through schedules, time, and pay

■ Schedules, time, and pay that hold up week after week

INDUSTRY FOOD MANUFACTURING FOOTPRINT MULTI STATE · MULTI PLANT TIMELINE UNDER 6 MONTHS

01

Steadied the config

Made schedules, time, and pay hold up under real plant conditions.

02

Cleared the backlog

Worked exceptions down until the platform ran clean.

03

Transferred the knowledge

Left the team running the practice on its own.

04

Built the confidence

A platform the operation counts on every week.

Stability after go live is what turns a new platform into a working practice.

Four Decisions Every HCM Integration Needs

TARGET	HRIS, IT, and integration owners
ASSET	Video · 16:9 · to record
HEADLINE	An integration can move data and still fail the business.
SUBHEAD	The difference is in the operating decisions behind the connection.

POST COPY

An integration can move data and still fail the business.

The difference is in the operating decisions behind the connection: which system owns the field, what triggers the update, what happens when a record fails, and who owns monitoring after go live.

Moe El-Abdallah leads Technical Services at Align HCM. In this follow-up, he breaks down the four questions his team wants answered before an integration is ready to build.

Eliminating manual work takes more than an API. It takes a reliable process around the data.

#SystemIntegration #HCM #HRTechnology

FRIDAY, AUGUST 28

Transform, or Gather Dust

TARGET	HR, enablement, and training leaders driving adoption
ASSET	Video · 1920x1080 · 45.0s · H.264
HEADLINE	A system either transforms your operations, or it gathers dust.
SUBHEAD	The difference lies entirely in training. Align Academy builds it around the role.

POST COPY

A system either transforms your operations, or it gathers dust. The difference lies entirely in training.

Align Academy trains administrators, managers, and employees separately, because each one needs something different from the same platform.

Role based design, custom learning paths, safe practice environments, and post launch reinforcement, because training is not a one time event.

Adoption climbs. Ticket volume falls. Workarounds disappear.

#AlignAcademy #HCMAoption #RoleBasedTraining
