

SEARCH + AI VISIBILITY OPPORTUNITY

HRchitect already has authority. The next move is **category coverage**.

A focused SEO, AEO, and GEO prospect brief for Samantha Coughlin, EVP, Marketing & Strategic Alliances.

AI mentions

64 cited pages in Semrush.

Built from live Semrush data, current Google AI results, public site inspection, and historical Align HCM evidence.

dillon-mohr-portfolio.netlify.app

Do not rebuild the brand. Make its expertise easier to extract.

HRchitect has real authority, service breadth, and proof. The highest leverage move is to organize that authority around buyer questions with measurable commercial intent.

The signal

HRchitect is not starting from zero. It already ranks for platform consulting and implementation terms that matter. The opportunity is to protect those wins while building cleaner coverage around integrations, migration, comparisons, and post implementation support.

The pitch is not 326 keywords. That raw gap includes irrelevant brand and navigational terms. The pitch is a qualified opportunity model that keeps only the terms HRchitect can credibly own, maps each term to the right page type, and measures the result across search, AI answers, and CRM outcomes.

Protect the pages that are already earning commercial visibility.

These rankings prove that HRchitect can win specialized HCM intent. Expansion should reinforce these entities and avoid cannibalizing the pages that already perform.

Keyword	Pos.	Vol.	KD	Ranking page
paylocity consulting firm	1	90	13	/paylocity/
ukg consultants	2	210	12	/ukg/
dayforce consulting services	4	90	9	/dayforce/
ukg pro implementation partner	4	90	12	/ukg/
hr technology consulting	5	480	18	/
hcm consulting	7	720	22	/

Commercial foundation

Platform pages already match service intent. Add clearer proof, direct answers, and expert review without changing their core job.

Content authority

Migration, vendor selection, and implementation articles can support decision journeys and link back to service pages.

Content hygiene

Legacy pages attract some off-topic traffic. Consolidate or isolate distractions so topical authority stays centered on HCM outcomes.

Five clusters turn a noisy gap into a practical roadmap.

Volumes are directional and related terms overlap. The point is to prioritize credible buyer problems, not inflate an audience estimate.

Qualified missing keyword	Volume	KD	Align position
workday implementation challenges	480	15	33
hr system integration	320	13	48
paylocity vs paychex	140	11	9
data conversion process	110	3	43
hr data integration services	110	19	5
workday implementation failures	110	8	13
paychex vs paylocity	90	8	4
paylocity implementation and optimization	90	1	8
payroll implementation checklist	70	2	8
workday post implementation support model	70	3	9

Classic rankings can become answer engine citations.

Two current Google checks revalidated Align HCM as an AI Overview source. Historical July evidence is included separately and labeled as historical.

Paychex vs Paylocity

Align HCM appears inside the generated answer as a cited source.

Data conversion strategy

Align HCM appears in the AI Overview source carousel.

How the system earns the chance to be cited: direct answers, specific comparison criteria, extractable headings, source-backed facts, expert review, tight internal linking, indexable pages, and consistent entity language across the site. July 2026 Semrush evidence recorded 11 distinct Align AI Overview keywords. Current results remain volatile and are not guaranteed.

The site is crawlable. Now make answers easier to extract.

Sampled pages: homepage, UKG, Paylocity, and Dayforce. This is a focused public audit, not a full crawl.

PASS	Crawl access robots.txt returns 200 and allows crawling.
PASS	Sitemaps Yoast index exposes core content, platform, service, leadership, and author maps.
PASS	Page hygiene Sampled pages return 200 with canonicals, one H1, titles, and descriptions.
PARTIAL	Baseline schema Organization, WebPage, WebSite, and BreadcrumbList are present.
OPPORTUNITY	Service schema Sampled commercial pages did not expose Service or FAQPage schema.
OPPORTUNITY	Answer extraction Add direct answers, comparison tables, process steps, FAQs, authorship, and citations.

ANSWER ENGINE FRAMEWORK

Structure

Direct answers, useful headings, tables, steps, FAQs, schema, canonical pages.

Authority

Named experts, original evidence, client proof, transparent sources, refresh ownership.

Presence

Consistent entities across search, partner ecosystems, earned media, and trusted third party citations.

Move from insight to a measurable publishing system.

A focused sprint can prove the operating model before wider expansion. Scope should be finalized against internal priorities, capacity, and CRM definitions.

WEEKS 1-2

Baseline + map

- Confirm conversion definitions
- Freeze keyword and AI benchmarks
- Map entities, pages, links, and proof
- Prioritize 5 commercial pages

WEEKS 3-6

Build + refresh

- Refresh priority platform pages
- Publish integration and migration hubs
- Create comparison and failure-prevention assets
- Add supported schema and author review

WEEKS 7-10

Distribute + validate

- Internal link deployment
- Partner and expert amplification
- Indexing and extraction QA
- AI citation and SERP monitoring

WEEKS 11-12

Measure + decide

- Search and AI movement
- Qualified landing-page behavior
- HubSpot source and lead review
- Next-quarter investment decision

Success is not a content count. It is a repeatable path from qualified intent to extractable answers, rankings and citations, engaged buyers, and CRM evidence that the right people are moving.

One operator. Connected systems. Human judgment in control.

The advantage is not one tool. It is the infrastructure that moves research, production, QA, publishing, and reporting through one governed loop.

Built across specialized skills, harnesses, MCPs, APIs, terminal agents, and integrations. The system accelerates the repeatable work so strategy, evidence, and editorial decisions receive more attention.

The source screens behind the opportunity model.

Authenticated Semrush screenshots captured from the current worldwide overview, US organic rankings, and HRchitect versus Align HCM keyword gap.

KEYWORD GAP 19 AUG 2026

July AI Overview captures, preserved with their original context.

These images are historical proof from July 2026. Current results were rechecked separately on 20 Aug 2026 and are shown on page 5.

Evidence interpretation

Paychex vs Paylocity visibly names Align HCM inside the AI Overview. The integration and data conversion captures show the AI Overview plus Align's corresponding organic result. They support the broader historical Semrush record, but they do not independently prove that Align was one of every collapsed source group.

WHY I SENT THIS

You followed me. It sparked an idea.

This is not tied to a job posting. I put it together because the overlap was interesting, the opportunity was real, and it was a useful way to show what I can build with the marketing systems I have spent the past year creating.

If this is useful, I would be glad to talk through the model.

The goal would be simple: protect what HRchitect already owns, build the missing category coverage, and connect search and AI visibility to qualified demand.
