

BAR CRAWL USA

CALL DECISIONS TRANSLATED INTO PRODUCTION

Eight landing pages. One fall runway.

A practical August build plan based on the full August 10 call record, the live event inventory, the existing evergreen queue, and the site's current canonical structure.

8

recommended canonical pages to rebuild

Not eight duplicate URLs. Each page becomes a clearer city or category hub with stronger search answers, local proof, event paths, and measurement.

BUILD

August, in two-page production waves

REVIEW

Fall campaigns ready for October 1

PAUSE

September paid activity

ACTIVATE

Around approved October events

The call aligned content, indexing, cash preservation, and fall activation into one operating rhythm.

Build and request indexing

Strengthen metadata, structured data, direct answers, FAQs, local proof, internal links, and ticket paths before the fall demand window.

Hold paid spend

Preserve cash while the pages age, indexing is checked, and event facts, assets, budgets, and tracking are finalized.

Make campaigns review ready

Prepare approved markets and events with final destinations, sitelinks, copy, creative, and measurement.

Activate around real events

Launch only after city, date, ticket, budget, media rights, and conversion readiness are confirmed.

Architecture rule: city pages remain the parent discovery hubs. Neighborhood and event variants sit beneath them. Existing canonical URLs are improved rather than multiplied.

Recommendation boundary

The call set the eight-page consolidation rule but did not name eight final URLs. This list is the evidence-based recommendation for approval.

Recommended August page set

- 01 **What Is a Bar Crawl?**
/what-is-a-bar-crawl-with-bar-crawl-usa/
- 02 **Macon**
/macon-bar-crawl/
- 03 **Atlanta**
/bar-crawls-atlanta/
- 04 **Columbia**
/columbia-bar-crawls/
- 05 **Greenville**
/greenville-bar-crawls/
- 06 **Alpharetta**

- 07 **Sarasota**
/sarasota-bar-crawls/
- 08 **St. Pete**
/st-pete-bar-crawls/

Backlog, not deleted

Duluth and Gainesville stay in the evergreen queue. They move behind the eight pages with the clearest current fall support.

Start with the answer page and a high-value city hub

One page explains the category. One turns existing Macon demand into a current event path.

01

NATIONAL EXPLAINER

What Is a Bar Crawl?

barcrawlusa.com/what-is-a-bar-crawl-with-bar-crawl-usa/

Own the basic question with a direct, trustworthy answer, then move new visitors from category education into a city, live event, and ticket path.

BUILD INTO THE PAGE

- Plain-language definition and how the experience works
- What a ticket can include and what varies by event
- First-timer checklist, safety, timing, and group guidance
- How Bar Crawl USA organizes the experience

SEARCH AND CONVERSION

- FAQ schema from real first-timer questions
- Concise answer blocks for AI and featured results
- Browse by city and current event modules
- Primary path: learn, choose a city, view event, buy ticket

Understand — Choose city — View event — Ticket

02

CITY HUB

Macon Bar Crawls

barcrawlusa.com/macon-bar-crawl/

Turn existing Macon visibility into a durable local hub supporting the current Boos & Booze and Ugly Sweater event records without replacing their individual event pages.

BUILD INTO THE PAGE

- Local overview and what makes the Macon route distinctive
- Current fall event modules with approved facts
- Past-event photo proof and organizer credibility
- First-timer FAQs, parking guidance, and planning cues

SEARCH AND CONVERSION

- Macon bar crawl, Halloween, and holiday intent clusters
- Internal links to both current fall event pages
- LocalBusiness and Event relationships where valid
- Primary path: city hub, chosen theme, ticket destination

Discover Macon — Choose theme — Confirm details — Ticket

Organize a major market and sharpen a seasonal city hub

Atlanta needs clean parent-child architecture. Columbia needs direct local proof and fall paths.

03

PARENT CITY HUB

Atlanta Bar Crawls

barcrawlusa.com/bar-crawls-atlanta/

Create the authoritative Atlanta parent hub so Beltline, Midtown, and other neighborhood or event variants support one discoverable city structure instead of competing with it.

BUILD INTO THE PAGE

- City overview with clear neighborhood navigation
- Current Atlanta event modules, including Beltline inventory
- Real crowd, venue, and route proof from approved media
- Neighborhood chooser and event calendar

SEARCH AND CONVERSION

- Atlanta bar crawl hub with neighborhood sub-intents
- Breadcrumb and internal-link architecture
- One canonical city answer for AI discovery
- Primary path: Atlanta, neighborhood, event, ticket

Atlanta — Neighborhood — Event — Ticket

04

CITY HUB

Columbia Bar Crawls

barcrawlusa.com/columbia-bar-crawls/

Give Columbia one evergreen discovery page that carries current Halloween and holiday demand while remaining useful between seasonal event windows.

BUILD INTO THE PAGE

- Local crawl overview and route-area context
- Current Boos & Booze and Ugly Sweater modules
- Approved attendee imagery and event experience proof
- Practical FAQs and what-to-expect guidance

SEARCH AND CONVERSION

- Columbia bar crawl plus seasonal intent coverage
- Direct answers with FAQ and breadcrumb structure
- Links to current event records and relevant guides
- Primary path: local intent, event match, ticket

Find Columbia — Compare events — Plan — Ticket

Strengthen one proof gap and one year-round market

Greenville needs disciplined use of existing media. Alpharetta spans evergreen and seasonal demand.

05

CITY HUB

Greenville Bar Crawls

barcrawlusa.com/greenville-bar-crawls/

Build a durable Greenville hub for the current Halloween and holiday events while acknowledging the call's media-coverage gap instead of masking it.

BUILD INTO THE PAGE

- Local overview and confirmed event modules
- Best approved photo proof available now
- Clear first-timer and route-area guidance
- Visible content slot for the future recap reel

SEARCH AND CONVERSION

- Greenville bar crawl and seasonal event intent
- FAQ answers that do not depend on unconfirmed details
- Internal links to current fall event records
- Media note: new recap footage remains a production task

Discover — See real proof — Choose event — Ticket

06

YEAR-ROUND HUB

Alpharetta Bar Crawls

barcrawlusa.com/alpharetta-bar-crawls/

Organize year-round Alpharetta discovery across current Bubbles & Bites and Ugly Sweater inventory, then leave a clean structure for future themes.

BUILD INTO THE PAGE

- Local hub introduction and theme selector
- Current Bubbles & Bites and holiday modules
- Approved local galleries, inclusions, and planning guidance
- Evergreen FAQs that work across event types

SEARCH AND CONVERSION

- Alpharetta bar crawl plus theme-specific intent
- Clear relationship between hub and event pages
- Structured answers for dates, formats, and ticket flow
- Primary path: city, theme, event details, ticket

Alpharetta — Choose theme — Review inclusions — Ticket

Complete the Florida fall path with two distinct city hubs

Each market keeps its own local proof, FAQs, event links, and measurement.

07

CITY HUB

Sarasota Bar Crawls

barcrawlusa.com/sarasota-bar-crawls/

Create a reliable Sarasota discovery hub supporting current Halloween and holiday inventory while keeping the page useful for future local event themes.

BUILD INTO THE PAGE

- Sarasota-specific introduction and route-area context
- Current Boos & Booze and Ugly Sweater modules
- Approved galleries, host proof, and event expectations
- Local planning and first-timer FAQs

SEARCH AND CONVERSION

- Sarasota bar crawl and seasonal intent coverage
- Direct answer blocks and relevant FAQ structure
- Event links with verified ticket destinations
- Separate analytics for hub, event, and ticket clicks

Find Sarasota ————— Choose event ————— Plan ————— Ticket

08

CITY HUB

St. Pete Bar Crawls

barcrawlusa.com/st-pete-bar-crawls/

Build a distinct St. Pete hub for current Halloween and holiday demand, with local language and proof that do not collapse the market into a generic Florida page.

BUILD INTO THE PAGE

- St. Pete-specific positioning and area guidance
- Current Boos & Booze and Ugly Sweater modules
- Approved local event imagery and attendee proof
- Practical FAQs and event expectations

SEARCH AND CONVERSION

- St. Pete and St. Petersburg query variants
- Canonical wording that avoids competing local pages
- Internal links to current fall event records
- Primary path: city hub, event, ticket destination

Find St. Pete ————— See local proof ————— Choose event ————— Ticket

Build once. Apply consistently. Measure separately.

The city story changes. The quality bar, source discipline, and measurement path do not.

Search foundation

- One verified canonical URL, title, description, and H1
- Breadcrumbs, page hierarchy, sitemap inclusion, and indexing request
- Valid structured data tied to facts visible on the page
- No duplicate city or neighborhood targets

Proof and experience

- Approved real event photos or video with reuse rights
- Clear expectations, inclusions, route-area cues, and organizer credibility
- Accessible image text and readable mobile composition
- No placeholder venue, date, price, or sold-out claims

Answer quality

- Direct summary near the top for human and AI retrieval
- Local context a generic competitor cannot reuse
- Useful FAQs based on real visitor questions
- Event facts sourced from approved live records

Conversion and measurement

- Current event modules with working ticket destinations
- Internal links from hub to event and relevant guides
- UTM governance for paid paths and separate ticket-click events
- Search Console and GA4 baseline captured after indexing

Done means
live and
evidenced.

A page is complete only when the canonical target, copy, schema, media rights, event links, mobile layout, accessibility, analytics, and indexing request have all passed review. Adraft in WordPress is progress, not completion.

01	02	03	04	05
Source facts	Search structure	Mobile and access	Links and tracking	Index request

Lock the source of truth first, then move through four focused build waves and one indexing pass.

The next three weeks

WAVE 1 Lock + build 01-02 Confirm canonical targets and source inputs. Build the explainer and Macon pages.	WAVE 2 Build 03-04 Resolve Atlanta hierarchy. Build Atlanta and Columbia with current event paths.	WAVE 3 Build 05-06 Handle Greenville's media gap honestly. Build Greenville and Alpharetta.	WAVE 4 Build 07-08 + index Finish Sarasota and St. Pete. QA all eight, request indexing, and capture the baseline.
---	--	---	--

Dillon	Build the eight pages, implement metadata, structured data, FAQs, internal links, ticket paths, and indexing; return with GSC and GA4 evidence after indexing.
Mac	Provide the short video proof of concept, attempt the SEMrush visibility view, and coordinate the call follow-through.
Sean	Follow up with Andy, include Dillon, and coordinate the end-of-August production call with Jenny and the assigned videographer.
Team	Confirm whether last year's Halloween reels are on YouTube, link approved videos to the relevant landing pages, and reconnect at the end of August or beginning of September.

Needed to begin cleanly

- Approval of the exact eight-page set
- Confirmed event facts and ticket destinations
- Venue, inclusion, and sold-out language
- Media folders, YouTube reel status, and reuse rights
- Market priorities and paid budget
- Tracking and conversion definition

Recommended decision

Approve this eight-page set and its canonical URLs, provide the listed inputs, and start the first two-page build wave immediately.
