

BAR CRAWL USA

Bar Crawl USA

Seasonal event growth plan, GA4, and Semrush evidence

REPORT STATUS

Weekly report rebuilt with separate seasonal plan and GA4/Semrush attachments

WEEKLY SIGNAL

Bar Crawl's Aug 3 to Aug 9 work moved from maintenance into a seasonal operating plan: current event inventory was checked, analytics evidence was assembled, and the October and December growth system was rebuilt around confirmed demand windows.

What we completed this week

WEEKLY
READ

- Delivered the earlier weekly handoff and then rebuilt the seasonal plan around the client's October and December demand windows.
- Validated the current event inventory as twelve October listings and twelve December listings, with November treated as the runway.
- Produced the latest analytical GA4 and Semrush report to ground traffic, search, and measurement decisions.
- Separated the weekly activity report, revised seasonal plan, and analytical report so the client receives three distinct documents.

Primary goal

NEXT ACTION WINDOW

Approve the seasonal sprint, repair event facts and tracking, and build the campaign-ready conversion and measurement system before activation.

Next planning period

August 2026

EXECUTIVE ANALYSIS

The latest source record changes the recommendation from generic maintenance to two defined seasonal growth sprints. The plan uses confirmed listings, existing media, city-level activation, lifecycle work, and ticket-path measurement.

The current analytics report supports seasonal traffic and search analysis, but ticket revenue still needs tracking repair and a tested purchase path before revenue, CPA, or ROAS decisions are used.

Channel performance

Aug 3 to Aug 9 activity and results by channel.

Seasonal growth system

Plan ready · approval needed

The revised plan covers twelve October and twelve December listings, two seasonal hubs, city-level Google Search, creative, lifecycle, partner, and measurement work.

Oct listings	Dec listings	Seasonal hubs	Approval
12	12	2	Open

Workstream / campaign	State	Spend / scope	Delivery	Signal
October Halloween sprint	Planned	—	12 listings	Sep 21 launch window
December Ugly Sweater sprint	Planned	—	12 listings	Nov runway

GA4 and Semrush

Analysis delivered · tracking repair open

The analytical PDF records the current measurement position, prior seasonal traffic, channel quality, and search opportunities without claiming verified ticket revenue.

Report	GA4	Semrush	Revenue
1	Reviewed	Reviewed	Pending

Workstream / campaign	State	Spend / scope	Delivery	Signal
Analytics evidence	Delivered	—	PDF	Source map
Purchase path	Pending	—	—	Repair and test

Weekly summary: Weekly report rebuilt with separate seasonal plan and GA4/Semrush attachments.

Weekly results and work completed

Weekly evidence is separated from downstream business outcomes.

Lead accounting: Platform-reported lead events are shown as whole integers where a current platform read was authorized. Platform activity remains separate from qualified inquiries, booked work, revenue, and other downstream outcomes. Unavailable fields remain pending validation.

Media results

No current Google Ads delivery is claimed for Aug 3 to Aug 9. The weekly work produced a revised seasonal system and a separate GA4/Semrush analytical read.

Business results

Ticket revenue is not yet verified by the current measurement path.

Next reporting focus

Repair tracking, validate event facts and ticket URLs, approve scope and budget, then measure ticket-path actions by city and event.

Work completed Aug 3 to Aug 9

WORK COMPLETED · WHY IT MATTERS · STATE

Inventory	Confirmed twelve October and twelve December listings and treated November as runway.	Creates the correct seasonal operating perimeter.	Verified
Plan	Rebuilt the October and December growth system around city, event, creative, lifecycle, and ticket-path work.	Adds a measurable activation layer beyond maintenance SEO.	Ready
Analytics	Produced the latest GA4 and Semrush analytical report.	Grounds the next conversation in current traffic and search evidence.	Delivered
Weekly packet	Kept the weekly report, revised plan, and analytical report separate.	Gives Andy the right document for each decision.	Delivered

August plan

Owned next steps, written for action.

Weekly highlights

- The seasonal plan now reflects confirmed October and December inventory.
- The latest analytics evidence is separated from the plan and weekly work report.

August focus

- Approve the seasonal sprint and repair event facts, ticket links, and tracking.
- Build the activation system only after budget, media rights, and scope are confirmed.
