

PAID PILOT · DISCOVERY WORKING SESSION

Custom Home Builder Authority Hub

Research, keyword priorities, architecture, and the decisions needed before final copy or WordPress publication.

Working-session deck. The Janice interview and WordPress staging review have not happened yet, so this is not the final presentation.

RECOMMENDATION

Keep the URL. Give it a clearer job.

Evolve **/marketing-agency-for-builders/** into the authority hub rather than launching a competing core page.

Preserve

- Established URL and internal links
- Useful builder-specific proof
- Approved awards, reviews, and examples

Change

- Lead with the buyer decision journey
- Show one practical growth blueprint
- Connect visibility to qualified demand

PUBLIC PAGE BASELINE · AUGUST 3

The foundation is useful. Mobile needs investigation first.

2,057

visible words

43

H1-H3 headings

26

mobile Lighthouse performance

28.6s

mobile LCP lab snapshot

These are public inventory and single lab results, not private analytics or field Core Web Vitals.

POSITIONING

Win by explaining the whole decision system.

Buyer trust

Show fit, process, proof, investment context, and the next step before another builder earns the call.

Search clarity

Use direct answers, sources, entities, internal links, and technical quality without magic AI claims.

Lead quality

Measure market fit, project fit, readiness, sales acceptance, and movement through the buying process.

SEMRUSH KEYWORD MAP

Three wedges can anchor the first build.

590 - KD 2%

SEO for home builders

Lead subpillar and local-visibility support.

480 - KD 9%

**Custom home builder
marketing**

Map to the existing authority page.

880 - KD 4%

**Website not generating
leads**

Conversion-led supporting article.

The attached CSV preserves all 62 selected, mapped, deferred, and rejected decisions. Semrush US desktop, checked August 4, 2026.

AUTHORITY ARCHITECTURE

One hub organizes three buyer decisions.

Strategy	Target market, buyer journey, marketing plan, referrals, and lead quality.
Search and AI	SEO, local visibility, answer-ready content, citations, entities, and discovery.
Website conversion	Proof, project stories, process clarity, accessibility, speed, and measurement.
Proof layer	Approved cases, FAQs, reviews, checklists, and future original research.

PREPARED NOW

The research is ready. The copy is still provisional.

Ready for review

- Public-site and competitor research
- 62-row keyword decision map
- Architecture, technical work order, and roadmaps
- SME interview guide

Working source material

- Authority pillar draft
- Two supporting article drafts
- FAQ set, metadata, and schema proposal
- Not approved or publication-ready

REQUIRED GATES

A human expert and a real staging route come next.

- 1 Janice SME interview**
Capture expertise, objections, examples, proof, language, and corrections.

- 2 Factual and editorial review**
Revise the three working drafts and remove every unsupported statement.

- 3 Verified WordPress staging**
Confirm role-specific access, target, QA owner, approval route, and rollback.

- 4 Final acceptance and presentation**
Review the revised copy and implementation proof before publication.

90-DAY SEQUENCE

Validate first. Publish in a controlled sequence.

Days 1-30

Interview, revise, confirm staging, apply keywords, fix priority technical issues, and define measurement.

Days 31-60

Publish only after approval; add subpillars, local SEO, AI visibility, and planning content.

Days 61-90

Add buyer-choice and lead-quality assets, one approved case story, and evidence-led optimization.

WORKING-SESSION DECISIONS

Four decisions unlock the final deliverable.

- Approve the one-hub direction.
- Schedule Janice's interview.
- Name the WordPress staging and review owners.
- Confirm final acceptance and presentation timing.

Recommended next action: align on the discovery direction, conduct the SME review, then finalize copy and implementation evidence.
