What we completed in August

AUGUST
RECAP

- Published the dedicated estimate destination and preserved campaign attribution into the quote path.
- Moved the account toward higher-intent Colorado Springs homeowner and project searches.
- Delivered weekly performance reports with platform events separated from qualified project outcomes.
- Produced the current Google Business Profile project-proof content batch for the local visibility program.

Primary goal

SEPTEMBER PLAN

Reconcile calls and forms to named estimate opportunities, then optimize service and location coverage from qualified project value.

Next planning period

September 2026

EXECUTIVE ANALYSIS

The high-intent Search campaign carried nearly all August spend and clicks. Average cost per click remained slightly more efficient than the current home-improvement benchmark.

The next gain is not more activity alone. It is matching calls and forms to named projects so service themes, landing-page refinements, and budget can follow actual estimate quality.
