

Momentum AI Division — decision sheet

Every row here is generated from pending-decisions.json. Nothing on this page is agreed until it is signed.

For the meeting: Friday 2026-09-11 Prepared 2026-09-05 · revised 2026-09-05 v2: reconsidered architecture, D19 and D20 added Generated 2026-09-07

For the meeting: Friday 2026-09-11	Prepared 2026-09-05 · revised 2026-09-05 v2: reconsidered architecture, D19 and D20 added	Generated 2026-09-07
------------------------------------	---	----------------------

#	TOPIC	QUESTION	PROPOSED	OWNER	BLOCKS	SIGN
D01	Division charter	Is the AI division chartered under Momentum Digital, with the four lanes Mac already put on the site as its structure?	Yes. Four lanes: AEO/GEO, AI Design, AI Marketing, AI Automation. One launch flagship per lane, one roadmap offer per lane, one free opener.	Mac + Dillon	any client-facing offer sheet, any outbound	
D02	Protected capacity	How many hours per week are protected, and which existing obligations are explicitly subtracted?	15 h/week: 10 delivery/review, 5 discovery/documentation/coordination. At most two active builds and one new setup start per week.	Mac	any delivery date commitment	
D03	Compensation arrangement	Agreed paid capacity, commission-only, or hybrid, and at what figures?	Protected paid capacity plus a bounded incentive. Figures deliberately left open.	Mac + Dillon	division launch	
D04	Price: AI Search Relevance sprint	Confirmed price \$1,500 setup and \$750/month for the 90-day sprint.	\$1,500 setup, \$750/month. Anchors: Fagan bought \$500/month; GT Clinic was quoted \$900/month; the pack proposed \$1,500/\$1,500.	Mac	proposal to any named buyer	
D05	Price: Spec build	Confirm or change \$3,500 fixed for one prototype in five working days.	\$3,500 fixed. Anchors: Puttery build proposed at \$2,500 to \$3,500; Design and branding published at \$3,000.	Mac	proposal to any named buyer	
D06	Price: Motion and Lead Ops	Confirm or change \$1,500 + \$1,250/month (Motion, credits at cost) and \$3,500 + \$1,500/month (Lead Ops).	As stated. Lead Ops keeps the pack's numbers. Motion sits above the published \$1,000/month social package because it includes film.	Mac	proposal to any named buyer	
D07	Support boundary	Confirm the support commitment and name primary and backup coverage.	Mon to Fri 9am to 5pm Eastern excluding agreed holidays; acknowledge a blocking incident within one business day.	Mac + Dillon	any signature	

#	TOPIC	QUESTION	PROPOSED	OWNER	BLOCKS	SIGN
D08	Named engines for AI Search	Which engines are named for the 20-question baseline, and by what access method?	Selected at kickoff. No unsupported automated scraping or account setup assumed. The demo uses a human-run baseline on Momentum's own domain.	Dillon + buyer	AI Search baseline	
D09	Account nomination	Which up to five relationship-approved accounts may receive a Snapshot and a discovery call?	Reviewed the week of September 14.	Mac	discovery calls, Snapshot runs on client domains	
D10	Outbound status and reporting	Has reporting started, and what reporting exists? (Mac's question, September 4.)	It has: 241 cold emails from Dillon's Gmail on September 2 to 3, zero verified human replies. In the same fortnight two hand-built audits reached the quote stage. Proposed: the audit-led opener replaces cold email, and reporting (sends, replies, quotes, signed, collected as separate counts) is defined before any further send.	Mac + Dillon	outbound	
D11	Deck sign-off	Resolve the open claims and named-case permissions in the existing 26-slide deck, and approve the eight-slide division addendum.	AEO scope and price, guarantee language, current published pricing, named-client use, whether Fractional CMO is a live offer, plus the addendum.	Mac	any demo using the deck	
D12	Original media reuse	Which original media may be reused, for which clients, under what permission?	Unresolved. A missing rights record is a hold, not implied permission.	Mac	Motion content deliverables using existing media	
D13	IP, accounts and exit	Who owns accounts, code and IP, and configuration, and what is the handoff on exit?	Must be specified in the proposal before sale. Pre-existing engines (radar, Puttery pattern, client-deck, film pipeline) versus newly built client work need separate treatment.	Mac + Dillon	any signature	
D14	Renewal, cancellation, data return	What data return, renewal, cancellation, transition-assistance and data return or deletion terms?	Must be written into the commercial agreement.	Mac + Dillon	any signature	

#	TOPIC	QUESTION	PROPOSED	OWNER	BLOCKS	SIGN
D15	Provider data-training policy	Why do providers, and are their current contracts and settings verified before real customer data is used?	Verify before use. Do not promise an unverified policy.	Dillon	any real customer data in a workflow	
D16	Working dates	Confirm the meeting is Friday September 11 and the working week that follows.	Friday September 11 per Dillon on September 5. September 7 is Labor Day.	Mac	the launch sequence	
D17	Site production target	10 unique unbuilt prospect sites the target, with 20/day as fallback?	Dillon's current instruction. Neither rate is a measured service guarantee and neither may be quoted to a buyer as one.	Dillon	any site-count claim in collateral	
D18	Budget and tool spend authority	Who is authorised, for which tools, and who approves an increase?	Resolved at the meeting.	Mac	client-facing paid generation, any third-party charge	
D19	Division name and lockup	How is division presented as Momentum AI, lettered as the existing Momentum Digital mark plus the word AI, with no new logo?	Yes. All collateral in this kit uses that lockup. It sits under Momentum Digital on needmomentum.com, not under Momentum 360, and uses the Momentum Digital tokens, not the 360 cyan and yellow.	Mac	publishing any division collateral	
D20	Generation credits on pass-through	On pass-through content system, are Higgsfield credits billed at cost per piece, disclosed on the invoice, on top of the \$1,250/month?	Yes. Measured rates on September 5: keyframe 8.5 credits, Seedance 2.0 Mini 10 credits per four-second leg. A typical monthly film plus six stills is roughly 90 to 120 credits. Reverify against the live account before quoting.	Mac	Motion content proposal to any named buyer	

Every item below is OPEN. Nothing here is agreed. Prices, capacity, compensation and targets are proposals until recorded as agreed. No contracts, outreach or account changes are implied by this file or by any collateral generated from it.
