

Video plan — use what exists, then finish the five films

Dillon Mohr · Momentum Digital

PRIVATE REVIEW EDITION · SEPTEMBER 2026

Complete source draft, formatted for your review. Publication status and open decisions are preserved inside.

Before this goes public

This is an internal review copy. Offers, pricing, first-person claims, client examples and delivery promises require their existing approvals before public use. This PDF export does not change the source approval status.

Source: VIDEO-PLAN.md

Typography: Archivo Black display, Georgia reading text and Calibri utility text. Georgia is a print-specific reading choice; the existing Momentum web design system is unchanged.

Video plan — use what exists, then finish the five films

Internal. 2026-09-07. No post, schedule, or spend from this file.

What is true right now

- Dillon said he has about 17 finished pieces. The Higgsfield account, read 2026-09-07, holds **50+ video objects**, many created in the last 48 hours. Titles are not on the media objects. Treat the account as a plate library, not a named showreel, until each clip is watched and tagged.
- The September 5 kit already specified the division showreel: F01 opener + F02–F05 lane films + S01–S08 stills. Budget about 365 credits, hard stop 450. Logo never touches a model. Composite locally.
- Higgsfield Max balance was 88.16 credits in the earlier session note. Re-read live before any new render. Do not start a new batch before Friday unless a named plate for F01–F05 is missing.
- Mac has already taste-checked AI video once ("good script, idk about the video/ai", August 29). Keep the human gate.

How the library gets used

Map every accepted clip to one job. A clip with no job stays in the library.

Funnel stage	Job	Source
Friday open	F01 division opener, 16:9, lockup composited, 16s	Planned film, or the strongest existing plate that matches the photogrammetry-fragment brief
Lane proof	F02–F05, 9:16, one per lane	Planned films. Existing clips can stand in as plates if they match the lane metaphor and have no faces, no logo deformation, no cyan/yellow 360 look
Snapshot leave-behind	8–12s silent loop behind the Snapshot cover	One abstract plate, no type in frame
Social, after D12 and D19	9:16 cuts + title cards already in ../2026-09-05-a i-division-launch-kit/video/cards/	Do not schedule
Jesse sell sheet	12s lead-ops motion or the opener	Internal only
Client Motion offer	Do not reuse Momentum plates on a client. New brief, new brand kit, new rights ledger	Offer 03

Acceptance before a clip is "division collateral"

1. No faces, hands, or founder likeness.

-
2. No generated text, letters, or warped logo.
 3. Palette is deep / brand blue / accent orange. Reject cyan, yellow, purple, neon.
 4. Verified Momentum Digital wordmark composited after render, QA frames at open, mid, close, final.
 5. Named job in the table above.
 6. SHA-256 in a local receipt. No orphan files.

Friday minimum

One opener Mac can watch without explanation. Four still title cards if the lane films are not composited. Do not spend the remaining credits chasing a fifth film the night before.

After Friday

Tag the existing 17 (or 50) clips in Claude Design artifact 19: thumbnail, duration, lane, funnel stage, pass/fail on the six checks. Then generate only the gaps. Credits pass through at cost on client Motion work (D20).
