

A system built to move.

Momentum Digital + AI division

Brand system v2.1.1 · Archival direction review draft · September 2026

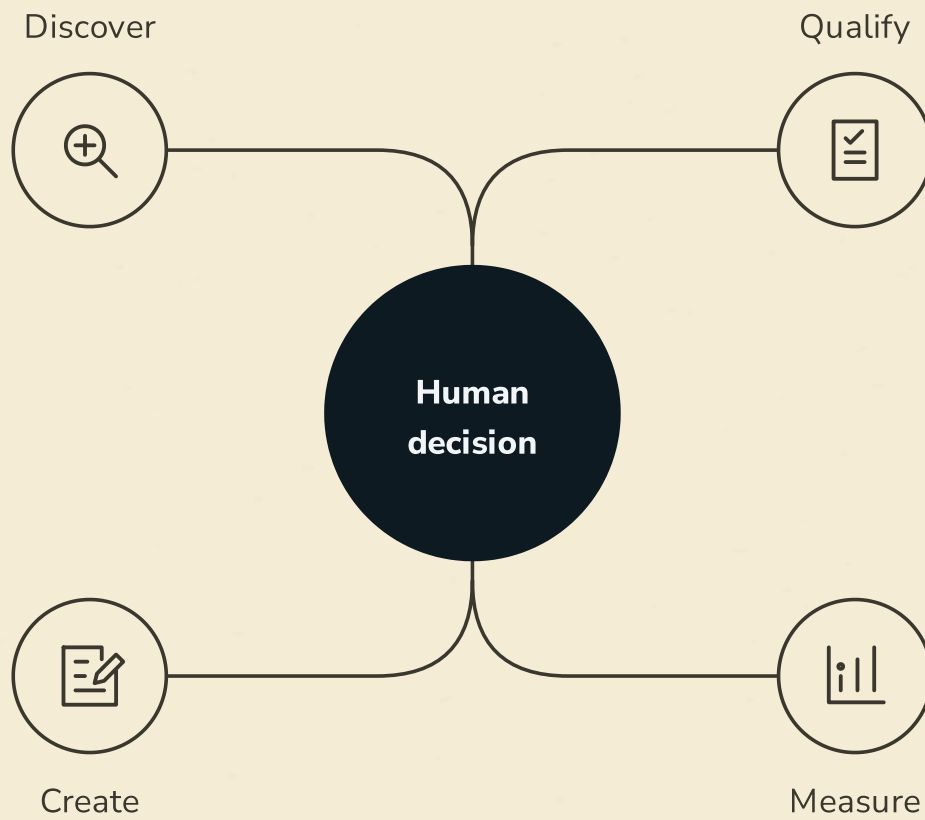

Confident type. Useful motion. An unmistakable identity, from the first frame to the final page.

Make the complex feel clear.

Our proposed visual language turns AI workflows into something you can follow, understand, and put to work.

Structure with energy.

Detail with a purpose.

Proposed direction: Momentum fieldnotes

Exact identity. More expressive craft.

Familiar identity. A richer material.

The original blue and orange remain. Ivory paper, inset plate marks and finely etched detail bring the supplied natural-history references into the whole system.

Momentum blue

#1E73BE · Identity

Action orange

#F58320 · Accent

Surface

#E9DFC8 · Archive surface

Deep

#0E1A22 · Contrast

Paper

#FAF3E1 · Archive paper

Bold ideas. Clear delivery.

Archivo Black · Display / chapter / end card

Good typography gives each idea the space it needs. Strong headlines establish the point. A calm reading face carries the explanation.

Nunito Sans · Body / navigation / captions

18 px body · 1.6 line height · 68-character measure

A publication you can use.

Chapter-led navigation, generous reading space, illustrated processes and useful takeaways.
The interactive edition moves; the PDF preserves the same hierarchy.

01

Start with the work. Then add the AI.

Before choosing an AI tool, map one recurring task. Write down its trigger, inputs, owner and expected result. A clear workflow is easier to improve than a vague ambition.

04 / Field guide

Find the repeating task

Look for a task with a clear beginning, consistent inputs and an outcome you can inspect.

Define a useful result

Describe what a good result contains and what would make it unusable.

Keep an accountable owner

Name the person who reviews exceptions and decides what happens next.

Illustrative editorial content for design review. This board demonstrates a reading system; it is not the completed flagship ebook.

A useful visual vocabulary.

Ten original SVG icons. One 32 px grid, one 1.6 px stroke, deliberate detail. Hover or focus to preview motion; select any icon to download its reusable source.

One voice. Every touchpoint.

Adapt the composition to the job. Service cards invite action. Forms reduce effort. Video end cards leave one clear thought.

Make room for better work.

Connect the steps that belong together. Keep people in control of the decisions that matter.

[Read the field guide](#)

Video typography

A single line of thought, enough time to read, and motion that resolves completely before the cut.

**Less
busywork.
More
momentum.**

AI division · needmomentum.com

A living collection of working ideas.

Archival fieldnotes, translated from your references: fibrous ivory paper, etched marks, specimen frames, marginal notes and purposeful layers. The material runs through the system; body copy stays still and readable.

Observation becomes understanding.

Visual reference. Original attachment from Dillon, shown unedited for this design review. Not original Momentum artwork.

Fieldnotes / material system

Keep the useful details.

A note needs an owner. A specimen needs a source. A working system needs both.

Index card

Subject: the next useful workflow

Owner: the person who reviews it

Outcome: a result that can be checked

Source annotation. Keep evidence beside the idea, not hidden in a footnote nobody can find.

A caption with a place in the collection.

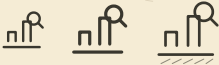

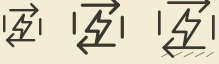

Second supplied reference: fine hatching, restrained patina and a pressed plate mark.

► Reusable scrapbook foundations

Small agents. Distinct roles.

Twelve role symbols shown at 24, 32 and 44 px. Clean versions serve interfaces; fine etched variants belong to specimen plates. A role label stays attached so meaning is never left to decoration.

The real logo. Every single time.

Identity is a fixed asset. Expression happens around it. These source files are copied exactly, with their original aspect ratios and transparency.

Use the full lockup on calm, light fields. Keep at least half a mark-height of clear space. Use the mark only where brand context is already clear. No redraws, recoloring, stretching, animated logos, or invented AI lockups.
